INTERNATIONAL GRD INC. Grease Recovery Device—General Specifications:

To furnish a Strainer Box and Basket Model PSB constructed of 3/16" thick polyethylene molded to be water tight and with no visible seams.

The GRD shall have a polyethylene molded gasketed cover fastened down with S/S latches and catches fastened in place. Please designate if recessed in floor for bolt down cover.

Interior components will be of polyethylene.

The Strainer basket shall capture food particles to be manually removed and placed in proper container by others.

The International GRD Strainer box and basket is for use ahead of the grease traps to remove food particles, or in other cases with problems of clogging lines caused by solids in waste water.
